37 Dargan Rd., Fortwilliam R'about,  
Belfast, BT3 9LZ.

If you were to  
imagine the **perfect  
energy partner...**

## A new energy provider with decades of experience

At Share Energy, we share 50% of all profits with our customers – a revolutionary business model, providing an alternative to established energy giants who continue to post record profits while ordinary people struggle to make ends meet.

While the name may be new, Share Energy is led by a team of seasoned professionals boasting more than 50 years experience in the sector. We're here to create positive and lasting change for our customers and we know that doing so depends on building mutually beneficial relationships with our suppliers.

Co-founder and CEO Damian Wilson brings a wealth of experience in the local energy sector

## Get excellent rates for your energy and help consumers enjoy a fair deal

We pay generators strong rates for green energy – often higher than those offered by Power NI – while automated invoicing eliminates the hassle of paperwork so you can focus on the things which matter most.

### Our rates for renewable energy typically exceed those paid by Power NI

Switching to Share Energy represents a fantastic opportunity for generators, while securing energy at source helps us head off the profiteering of legacy providers. In short, you can increase your bottom line while helping to deliver a better deal for consumers all over Northern Ireland.

“ Our smart tracker agreements monitor market values to ensure you again be locked into an unfair rate.

## Our agreements ensure you're never locked in to low rates

Share Energy is currently the only provider to offer Smart Tracker Agreements which constantly monitor the market to ensure that the price you're paid is in line with current values, which means you'll never be locked into unfair rates again.

**We're also the only provider to pay our suppliers on all 3 revenue streams**

- ✓ PPAs – Ultra Competitive Rates
- ✓ ROCs – Ultra Competitive Rates
- ✓ REGOs – We'll give you 100% of the auction price

## Fast, friendly support from our local team

Our highly trained customer support team are based right here in Northern Ireland and ready to help with any issues that might arise with Ofgem, NIE, or your Share Energy account.
